12:00pm-1:00pm	Lunch at the Kidney Lawn
1:00pm-1:45pm	Session 4: 'Build the best precinct at QUT' Challenge Work as property economists to shape a future QUT precinct, making smart, strategic land use decisions by considering property values and real-world constraints to create an optimal outcome. Dr Andrea Blake, QUT
1:45pm-2:30pm	Session 5: Q&A with QUT Student and Alumni Panel Ask questions and gain valuable insights into the experience of studying at QUT from current students, and how it has shaped their careers from successful alumni.

'A career in economics was a natural fit for my passion for public and economic policy. Economics is the universal language of decision making and I can see the difference good policy advice makes in shaping the lives of Australians through the work we do at Deloitte Access Economics. The mix of theoretical, technical and very practical skills I gained at QUT was the foundation for pursuing my passion.' ~ Claire Atkinson

'I chose QUT for their outstanding alumni community, networking opportunities and industry connections. Often the clients in case studies were real businesses affected by real global issues (such as sustainability problems). Now I simultaneously study two areas I am very passionate about over four years, and leave with a strong skillset for problem solving, number-crunching, and even experimental design.' ~ Antonio Moeaki
